

# SAM® SPLINT

The gold standard in splints

The SAM® SPLINT is based on an ancient construction principle: curves are strong. The SAM SPLINT is built from a thin core of aluminum alloy, sandwiched between two layers of closed-cell foam. The splint is exceptionally pliable. Bent into any of three simple curves, it becomes extremely strong and supportive for any fractured or injured limb. The SAM® SPLINT XL meets the demands of today's larger individuals.

## FEATURES AND BENEFITS

- Waterproof
- Reusable
- Lightweight and compact
- Radiolucent
- Fastens in place with tape or wrap of choice, no extra equipment is needed
- Not affected by extreme temperatures or altitudes
- Closed-cell foam allows easy cleaning and disinfection; material compatible with all standard cleaning solutions
- Provides added stability for all limbs including the neck
